	<b>Evt. linjenr.</b>	<b>Kommentar</b>	<b>Begrundet håndtering af kommentar</b>	<b>Ansvarlig for håndtering</b>
<b>1</b>		Please consider changing the title to 'Marine mammals surveys – pre-investigations for offshore wind farms in the area North Sea I'. This will align the title with the bat and the bird report. Please do not use the term WP D as this on internal term used for project management.	Done	SSV (Signe Sveegaard)
<b>2</b>	77 - 87	The text has not been changed since the First draft version. Question: When can all the results of the first-year report be presented in a report that can be reviewed before publication?	All data are included now. Text is amended.	SSV
<b>3</b>	85	Please consider if QuietOceans should be mentioned in the Declaration as they are mentioned in line 80.	They are included now.	SSV
<b>4</b>	135	Please delete work package D.	Done	SSV
<b>5</b>	187	Should 'pre-investigation area' be 'survey area'?	Yes, changed.	SSV
<b>6</b>	189	Please change 'project area' to 'survey area' – as defined in the terminology list	Done	SSV
<b>7</b>	484 + 522	Are figures 2.11 and figure 2.14 not the same? Please include correct map for tagging positions for grey seals	Yes. That is a mistake. Corrected.	SSV
<b>8</b>	536	Please consider changing 'We' to 'This study'	Done	SSV

9	629-630	In order to avoid confusion about the total number of PODs deployed, please delete 'Furthermore' - and change 'seven additional' to 'seven of the stations'	"Furthermore" is deleted, but the seven stations are additional to the 35 grid-stations. The text has been revised.	SSV
10	712-715	Consider changing the wording to 'Geophysical surveys were conducted in the survey area while PAM data was collected. The potential effect of survey activities on PAM data is currently being investigated in a separate study. When concluded, the methods and results will be included in a later version of this report or the report resulting from the 2 <sup>nd</sup> year of surveying'	The text has been amended.	SSV
11	1013-1016	Question: Are the results of the 8-PAM stations deployed included in this report....if not, when will they be reported.	The 8 soundtrap deployment will be reported in year 2 report. The text has been amended.	SSV
12	1063	Question: Will the new underwater noise maps be included in this report - if not, when will they be reported?	They are reported in this final version of the Y1 report.	SSV
13	1100	The text says 'So far, 86% ....' Question: In terms of the full reporting of year-one will this be amended?	The text is revised. This is the final data report for year 1.	SSV
14	1110-1112	The sentence seems to be incomplete.	Text amended.	SSV
15	1121	Table 4-1: Consider renaming the title of third column under data '% Detections' instead of '% Succes'	"% Detections" are misleading as this refers to the number of days with successfully functional equipment. The table text is amended	SSV
16	1298-1299	The text says '....it is currently being reviewed....current results should be considered preliminary'. Question: When will the analysis be completed and included in a complete first-year report?	This text has been removed. This type of interference analysis is not within the original scope of this project, and therefore there are no hours to complete it.	ETG (Emily T. Griffiths)

17	1310	Please consider adding a column to Table 4-6 which shows the % difference between 'hours available' and 'hours analyzed'.	Done	ETG
18	1371	Please include the recent decision to move this extra summer survey to fall 2024 – as it was not possible to conduct the last summer survey	Done	SSV
19	1374	Add 'arm' so it says Farm.	Done	SSV
20	1385	Please provide an explanation for why the 'completed effort (km)' differs between the three aerial survey dates, especially why 2 <sup>nd</sup> August covers 33% larger area than 12 <sup>th</sup> May and 14 <sup>th</sup> June.	That is a mistake. Corrected.	SSV
21	(1385)-820	Please include the total km of transect lines in the method description of aerial survey, so that the reader can compare this to the 'completed effort' in Table 4-7.	Done	SSV
22	1398	Please delete Figure 4-15 reference in text (keep Figure 4-18)	Done	SSV
23	1623	Figure 4-32: Consider adding a thumb nail overview map of the area	Done	JAT (Jakob Tougaard)
24	1718 + 1766-67 1783-1784	Please add year to mentioned surveys (SCAN and EINS)	Done	SSV
25	1740	Please consider writing 'which commenced operation in 2019' instead of 'which was finished in 2019'. Or 'construction completed in 2019'.	Done	SSV
26	1745	The text says '...indicating that the construction of the wind farm has benefitted harbour porpoise'. Please consider if the difference between the two survey periods (2012-2013) and (2023-2024) is enough to indicate this. The two surveys are ten years apart and several other factors could impact the presence of harbour porpoise in the area.	Yes, but since the control stations outside the windfarm has not increased, this is the most logical reason. So we have altered the text a bit for clarity	SSV
27	1820-1824	When will the data from the fall 2024 survey of harbour porpoises around operating turbines be reported?	In the Y2 report. this information has been included in the text.	SSV
